

Application Serial No.: 10/673,522  
Amendment and Response to March 23, 2006 Non-Final Office Action

## **AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph at page 7, lines 7 – 16 with the following amended paragraph:

There is a market opportunity for systems, means, computer code, and methods that allow and enable mapping of device oriented contexts to identity oriented contexts and/or allowing mapping of identity oriented contexts to device oriented contexts. For example, in some embodiments an identity may be or include an individual person or a group of people. An identity context for the identity could be a state of "in meeting," "on vacation," "in the office," "out of the office," "roaming," "offline," "online," "unknown," "on business trip," "in transit," "mobile," etc. Thus, the identify context describes the implied availability of the identity. An identity context then may allow an identity to have an overall state that describes the work or non-work state that that the identity is in.
